---

## ABOUT ME

Frontend developer with experience in building production web and mobile applications using React and TypeScript.

Worked in entertainment and fintech companies, contributing to UI development, real-time functionality, API integration, and web3 payment solutions.

Experience as a navigation officer in the commercial fleet developed skills in decision-making under stress, attention to detail, and working according to strict procedures.

Currently seeking a position as a frontend developer to grow professionally and participate in challenging projects.

---

## TECHNICAL SKILLS

- JavaScript (ES6+) • TypeScript • Next.js • React • MobX
- HTML5 • CSS3 • CSS3 • UI Libraries (AntD, Swiper, Tabler Icons, Recharts, d3.js)
- REST APIs (fetch, axios) • Apollo, GraphQL
- Git, GitHub

## ADDITIONAL SKILLS

- Attention to detail
- Technical documentation analysis
- Team communication
- Problem-solving

---

## WORK EXPERIENCE

**Jan 2025 – Dec 2025: Frontend Developer — NDA (B2B platform for crypto and fiat payments)**

**Tech Stack: React • TypeScript • MobX • React-query • ether.js**

- Developed frontend for web and mobile applications using React
- Managed state with MobX and React-query
- Ensured secure data transfer and storage in keychain
- Integrated crypto wallets and web3 payment solutions (ether.js, WalletConnect)
- Maintained code quality and participated in code reviews

### Implemented Modules and Features:

- Built a custom solution for storing complex filters in query strings in the admin panel
- Developed a utility for secure data transfer in a mobile application using multiple encryption methods
- Integrated and maintained web3 libraries for crypto payments and wallet connections

**Jun 2023 – Dec 2024: Junior Frontend Developer — Godji Entertainment Provider**

**Tech Stack: React • TypeScript • Next.js • Ant Design**

- Developed a scalable frontend using React + Next.js + TypeScript
- Worked with REST and GraphQL APIs, ensuring state management and error handling
- Built responsive UI components using Ant Design
- Collaborated with the team via Git and code review processes
- Maintained high code quality (ESLint, Prettier, strict typing)

### **Implemented Modules and Features:**

- Developed an online booking system considering real-time seat availability
- Created a universal form generator based on configurations with dynamic validation
- Implemented complex user scenarios (various service types, tariffs, time slots)
- Built the full tournament user flow: registration, participation, statuses, results
- Designed UI for schedules, tournament grids, and notifications
- Integrated STRIPE payment widget and implemented payment processing flows
- Implemented UX flows for successful and failed transactions
- Ensured proper handling of edge cases (duplicate payments, cancellations)
- Developed a subscription management interface (activation, renewal, cancellation)
