SUMMARY

iOS developer focused on building polished, production-ready apps - independently shipped three apps to the App Store.

Previously worked as a frontend developer (React, TypeScript), which shaped a strong foundation in UI/UX, API design, and maintainable code.

Earlier in my career, I served as a navigation officer in the commercial fleet, where I developed strong decision-making skills under pressure, attention to detail, and the ability to operate within strict procedures - qualities I now apply to software development.

TECHNICAL SKILLS

iOS / Swift: Swift, SwiftUI, UIKit, Observation, Combine, SwiftData, Core Data, UserDefaults, MVVM, Swift Concurrency, URLSession, LocalAuthentication, UserNotifications, Swift Testing, XCUITest, WidgetKit, StoreKit 2

Frontend: JavaScript (ES6+), TypeScript, React, Next.js, React Native, GraphQL, REST APIs, Tailwind CSS, Ant Design, Shadcn

Tools: Git, GitHub, Xcode

IOS APPS

Money Tracker [App Store](#)

Personal finance tracker for managing assets, liabilities, budgets, and savings goals.

Tech Stack: *Swift · SwiftUI · Observation · MVVM · SwiftData · StoreKit 2 · Swift Testing · XCUITest · Local Authentication · User Notifications*

- Architected a complex personal finance system with multi-account portfolios and cross-currency transaction support.
- Engineered a real-time data sync layer using SwiftData and iCloud, ensuring seamless data persistence across devices
- Integrated Yahoo Finance API for live stock/crypto tracking and implemented weighted average cost basis calculations.
- Security: Implemented biometric authentication (Face ID/Touch ID) using LocalAuthentication framework.

Currency & Rates Converter [App Store](#)

Real-time currency converter with an inline calculator and live Yahoo Finance rates.

Tech Stack: *Swift · SwiftUI · Observation · MVVM · SwiftData · StoreKit 2 · Swift Testing*

- Implemented a TTL-based local cache (UserDefaults) for Yahoo Finance exchange rates, cutting redundant network calls and serving last-known rates offline.
- Developed a custom math expression evaluator for an inline calculator, improving user efficiency during conversions

TimeFeel [App Store](#)

Track any countdown or progress with widgets and smart push notifications.

Tech Stack: *Swift · SwiftUI · SwiftData · WidgetKit · UserNotifications · StoreKit 2*

- WidgetKit integration: home screen widget (systemSmall) and lock screen widget (accessoryCircular, accessoryRectangular) with AppIntents configuration
- Configurable push notifications: trigger by days/hours remaining or elapsed, % completed, or exact completion moment
- Radial chart view showing real-time progress, confetti animation on completion, haptic feedback
- iCloud sync across devices
- Notification scheduling engine recomputes all pending notifications on every app launch, keeping them correct after edits, deletions, and device clock/timezone changes

WORK EXPERIENCE

Independent iOS Developer | Dec 2025 – Present

- **Solo end-to-end delivery** - Designed, built, and shipped 3 production apps to the App Store single-handedly: architecture, SwiftUI interfaces, networking, and SwiftData/CloudKit persistence.
- **Engineering quality** - Structured every app on a protocol-driven MVVM architecture with dependency injection and Swift Testing coverage, keeping code modular, testable, and easy to extend.
- **Release & monetization** - Ran the full App Store Connect pipeline: StoreKit 2 in-app purchases, TestFlight builds, privacy nutrition labels, and metadata/ASO.

Frontend Developer | Godji Entertainment Provider | Jun 2025 – Dec 2025

- Developed scalable UI components for a live entertainment platform using React, Next.js, and TypeScript.
- Integrated REST and GraphQL APIs end-to-end: shaped how I design service layers and async data flows in Swift today
- Bridge to iOS: Gained deep intuition for client-server architecture and async data flows (REST/GraphQL), which I now apply to Swift networking layers.

EDUCATION

Bachelor's Degree, Navigation & Ship Handling at Sea

Kherson State Maritime Academy | 2021
